

Diesel Technician

Where fun meets perfection. Apply Now!

We are seeking a reliable, experienced diesel specialist who wants to join our full-service performance and repair shop.

Does a clean, well-lit facility with reliable hours and NO WEEKENDS appeal to you? Do you enjoy following a process and producing polished work? If so, keep reading.

We are looking for a Diesel Technician who:

- Enjoys the freedom of diving headfirst into large-scale technical automotive projects
- Seeks a community of fellow likeminded mechanics
- Is at their best in a structured environment where the expectation is detail and precision
- Thrives in a collaborative environment where the common objective is what's under the hood

To succeed in this position, you must have the ability to troubleshoot and precisely diagnose light duty diesel trucks. This position requires someone who can think and work independently, consistently solve problems and be part of a team that regularly exceeds our customers' expectations.

Calibrated Power Solutions is a leader in diesel performance engineering. We design and build high-quality performance calibrations and turbo systems, serving diesel enthusiasts across North America. Our team takes pride in combining innovative design with robust testing to deliver power, drivability, and reliability that stand above the rest.

Job Type: Full time, First shift, NO WEEKENDS

Benefits: 401K with Company Match, Paid Vacation, Paid Holidays, Paid Personal Days, Health, Dental and Vision Insurance with 70% Employee Coverage, Employee Discount + more!
